

Part1:

After talking to a few people regarding what they would like to see in a weather app, there are a few key features that it needs to have. The first feature is the ability to easily see the weather for the whole day. The second feature is weekly weather tracking so that they can plan ahead and be prepared. People also want to be able to see the wind, UV, rain, and other conditions. The app also needs to have the ability to show weather for other locations in the same format.

Part 2:

Now	10pm	11pm	12am
73°	68°	65°	62°

Today	Sunday	Monday
62-80	65-83	60-72
<u>sunny</u>	cloudy	rainy

Wind	Feels like	Humidity	UV
7 mph	73		3
